(54) DEVICE AND METHOD FOR ANALYSIS USING FREE WORD AND STORAGE MEDIUM

(57)Abstract:

PROBLEM TO BE SOLVED: To pick up several factors present in a factor, to accurately grasp an important factor, and to display image showing what is the center factor of evaluation and what relation the center factor and other factors have when an object to be evaluated is analyzed by using free words.

SOLUTION: This device is equipped with a storage means 4 which stores multiple factors, factor related information on the factors, and factor correlativity information, a processor 5 which obtain appearance frequencies of factors in free words by factors, computes the points of the respective factors by using the obtained frequencies of appearance and factor correlation information, and generates data for arranging and displaying all or some of the factors in specific form by using the computed points of the respective factors and the factor relation information, and an output means 7 which receives the data and displays all or some of the factors arranged in the specific format.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's

decision of rejection]

[Date of extinction of right]
